## Technical Memoranda and Reports

### Disclaimer:

Technical memoranda and reports were prepared as independent documents to support the preparation of the Supplemental Draft Environmental Impact Statement (SDEIS) for the Dallas CBD Second Light Rail Alignment (D2 Subway). Information from these documents was incorporated into the SDEIS to provide information on existing conditions, and in some cases, assess potential impacts to the resources. Information contained in the SDEIS is the most current and supersedes information in the technical memoranda and reports.

## **Hazardous Materials Existing Conditions Technical Memorandum**

# Technical Memorandum

Date: Tuesday, November 12, 2019

Project: GPC6, C-2012668-02, Task Order #39 Dallas CBD Second Light Rail Alignment (D2 Subway)

To: Kay Shelton, Project Manager, DART Capital Planning

From: James Frye, GPC6 Project Manager

Subject: D2 Corridor Hazardous Materials Existing Conditions Technical Memorandum

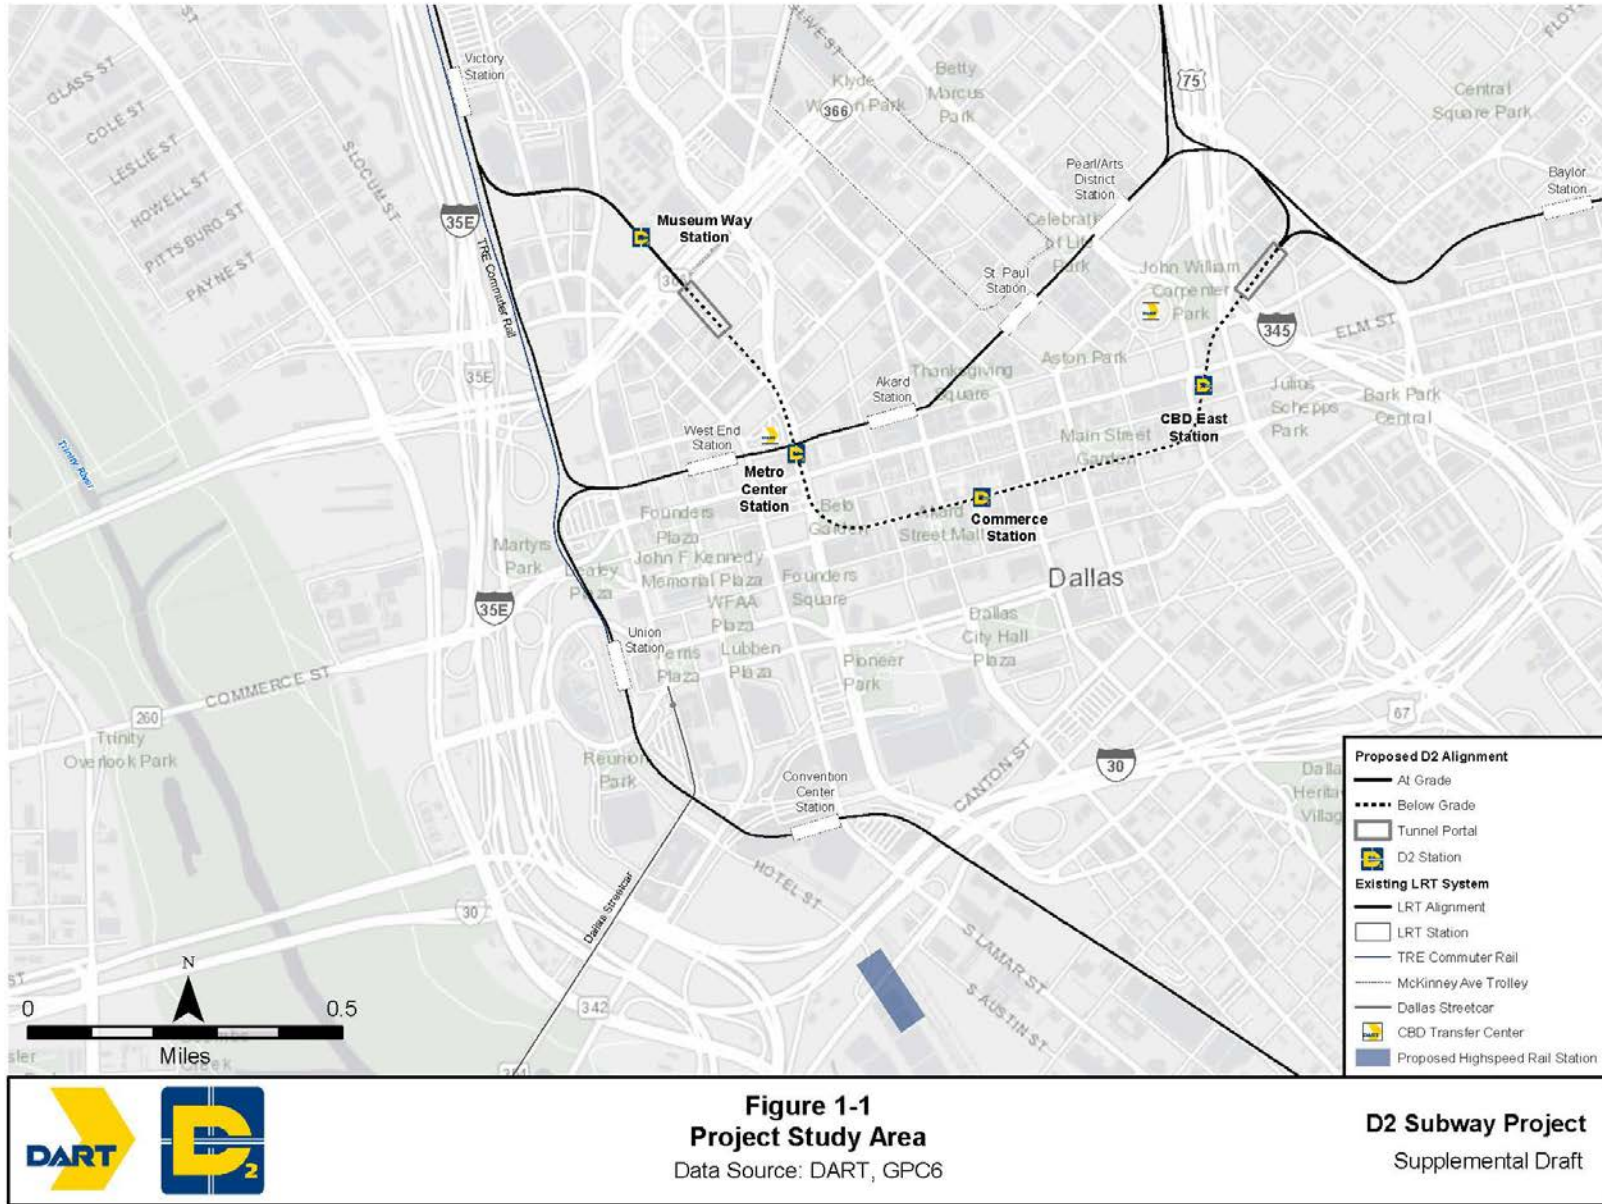

## 1.0 Introduction

Dallas Area Rapid Transit (DART) tasked HDR Engineering, Inc. (HDR) with providing a screening of hazardous materials issues associated with the D2 Corridor. This report will provide an overview of environmental Hazardous and Regulated Material release sites (Hazmat) present within 300 feet of at-grade sections, and 600 feet of below-grade proposed improvements of the D2 Corridor. This screening level assessment does not conform to the ASTM E1527-13 standard for Phase I Environmental Site Assessments, and is intended to provide an overview of known sites with a regulatory history. Only an American Society for Testing and Materials (ASTM)-conforming Phase I can provide a robust picture of sites that may have existed before regulatory records were reliably kept (around 1990).

### 1.1 Study Area

The D2 Corridor is shown on Figure 1-1. The study area for Hazmat is generally defined as a 300-foot distance from the centerline of the proposed at-grade improvements, and a 600-foot distance from the centerline of the proposed subway components of the project. This assessment will identify known hazardous waste sites for the D2 Corridor, and rank them according to each site's likelihood of having actionable contamination that would affect the project.

Figure 1-1. Project Study Area

## 2.0 LEGAL AND REGULATORY CONTEXT

### 2.1 Regulatory Data Search

Multiple regulatory acts address contaminants and hazardous materials, including the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), the Superfund Amendments and Reauthorization Act (SARA), the Resource Conservation and Recovery Act (RCRA), the Toxic Substances Control Act (TSCA), the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), the Clean Air Act (CAA), and the Clean Water Act (CWA). These, and other regulatory acts are described in the Environmental Data Resources, Inc. (EDR) report, which was generated for this project (Appendix B). Federal, state, and local databases have been developed to keep track of sites which handle, generate, transport, store, or dispose of hazardous and/or regulated materials and wastes, in accordance with applicable environmental laws. An automated search of these regulatory databases, based on geocoded locations of the site's listed address, was conducted by EDR in July 2018 (EDR, 2018). Federal, state, local, and tribal regulatory databases were searched for sites located within the ASTM-specified search distances (as listed in the ASTM E 1527-13 guidance) from the project centerline (EDR, 2018). HDR specified expanded search distances for certain databases that the ASTM requirement includes only target address or 1/8 mile coverage, to include the 300- and 600-foot distances used for this screening report. Also included in the search were sites that have sustained a known release of contaminants to soil or groundwater.

### 2.2 Interviews

In accordance with client direction, no interviews were conducted during this assessment.

## 3.0 METHODOLOGY

The D2 Corridor was evaluated by reviewing available regulatory agency databases and topographic maps, and by performing a limited site reconnaissance. These documents and site visits were intended to serve as an overall environmental screening method for the D2 Corridor, in order to identify sites with potential hazardous waste issues that are known to regulatory authorities. This environmental screening does not consider historical sites, or sites with no recorded regulatory history (but with potential issues). Therefore, it does not constitute an ASTM 1527-13-conforming Phase I Environmental Site Assessment (ESA). In addition, sites may be missed or not considered if they existed prior to modern environmental recordkeeping (generally pre-1990). It is also important to note that this screening report, like the ASTM E 1527-13 Phase I ESA scope, does not include asbestos, mold, radon, indoor air quality, or any of the other "non-scope considerations" listed in the ASTM E 1527-13 standard. Asbestos, as an example, could be a significant issue during any building demolitions for the project, but a separate asbestos assessment protocol exists to manage that issue.

### 3.1 Regulatory Database Review

Listed hazardous materials / hazardous waste release sites were evaluated and ranked, using a described relative risk ranking system, and using an automated regulatory database search product provided by EDR (described in **Section 2.1**). This report addresses sites located within 300 feet of aboveground components of the D2 Corridor, and within 600 feet of proposed sub-surface components. Sites of concern were identified based on their listing in the EDR report, with emphasis placed on certain databases that indicate releases or violations. Databases of particular concern are listed on **Table 3-1**. Many of the sites that were identified during this initial screening were included in a site reconnaissance conducted July 12, 2018. The site reconnaissance was performed to help define the probable risk to the D2 Corridor and subway system. Due to its large size, the EDR Report is presented as an attachment in an electronic format (**Attachment B**).

### 3.2 Site Reconnaissance

The site reconnaissance was conducted on July 12, 2018, and sites were viewed from vantage points on public right-of-way (ROW) (no site access was requested or gained). The site reconnaissance included the proposed project corridor as of July 2018, and sites identified during the initial screening of the EDR report. Sites were identified during the initial screening of the EDR report based on the site's database listing, and its distance from the D2 Corridor (at-grade or subsurface components). Of 1,720 listings identified in the EDR report located within the search radii (multiple listings occurred for many individual addresses or sites), over 50 sites (based on distance from the corridor centerline) were visited during the site reconnaissance to assist in determining the potential for hazardous materials issues that might impact the D2 project. A reconnaissance of the proposed D2 alignment was completed by vehicle and pedestrian survey.

During the site reconnaissance, a Site Data Form was completed for each site where the type of listing, and the distance and direction from the site to the corridor, indicated that a potential existed for hazardous materials or wastes to impact the D2 project. Photographs were taken at these locations. Select site photographs are included in **Attachment A**.

### 3.4 Topography and Aerial Photo Review

Topographic maps provided with the EDR regulatory agency database report were reviewed to locate the potential Hazmat site, and to compare their topographic elevation with the proposed project components (uphill sites were ranked as higher risk than downhill sites). Sites listed in databases of concern were visited during the site reconnaissance to verify the distance of those identified sites from the D2 Corridor, and the presence of other potential Hazmat sites. Historical aerial photos were not reviewed – this step is reserved for an ASTM-conforming Phase I ESA, and can establish sites of concern that may have existed before modern regulatory records began (around 1990).

### 3.5 Risk Ranking

HDR employs a relative risk ranking system that includes several investigative elements to describe “sites of concern” located within a Project Corridor. A site of concern is a site that the investigative process has determined to have sufficient possibility of contamination, which warrants special attention during the (later) ASTM-conforming Phase I investigation. A site of concern may or may not ultimately be classified as a REC (Recognized Environmental Condition, as determined by a full Phase I, and defined in ASTM E 1527-13), yet still may be “of concern” and is therefore highlighted in the report. A site of concern may or may not be carried forward in recommendations for further investigation, depending upon the specific issues associated with the site.

Once the elements of the investigative process were completed, HDR categorized the identified sites using a subjective risk ranking system, classifying the sites as Low Risk, Moderate Risk, High Risk, or (in some instances) Indeterminate Risk. The following paragraphs provide general descriptions of each category.

**Low Risk** sites are those sites that have few indications of potential for release of hazardous materials. On some occasions, sites that have had a hazardous materials issue in the past but have been remediated with approval of the local state environmental agency or the U.S. Environmental Protection Agency (EPA) may qualify as low risk. Examples of Low Risk sites include undeveloped or agricultural property, residential property, or benign commercial properties such as office buildings, warehouses, distribution facilities, or municipal facilities with no listed violation.

**Moderate Risk** sites are those sites that have some indications of possible hazardous materials issues. A Moderate Risk site may appear on a database as having a permit to handle hazardous materials, but has recorded no violations to date. Another way that a site could be interpreted as Moderate Risk would be if the environmental records search indicated no listing, but the site is an auto repair facility with serious surface staining. Examples of Moderate Risk sites include auto repair garages, welding shops, or manufacturing facilities with minor listings in the environmental database.

**High Risk** sites are those sites that have a high potential for releasing hazardous materials to the soil or groundwater, or have a recorded release issue. Examples of High Risk sites include current service stations, bulk fueling terminals, sites listed in environmental databases as having had a release, or a known release that has not been remediated.

**Indeterminate Risk** sites are those which, at the time of report preparation, did not include sufficient information to include a High, Moderate or Low ranking. Indeterminate Risk sites often require additional file review, site reconnaissance, interviews, or historical research to determine the details of any related environmental issues at the site.

When HDR assigns a risk ranking to a site or condition at a site, the risk ranking criteria are reviewed and concurred with by at least one Environmental Professional as defined in ASTM. It is HDR policy to have subjective criteria cross-reviewed for accuracy and adherence to its assessment protocols and internal quality assurance standards. It is worthwhile to note that risk ranking does not directly correspond to whether a site qualifies as a REC; rather, the risk ranking system is intended as a method of categorizing sites on large projects for consideration of common contamination characteristics.

HDR included two of the primary investigative activities included in the ASTM guidance (conforming to EPA's All Appropriate Inquiry (AAI) requirements), namely (1) records review (including historical data sources), and (2) site reconnaissance. No historical source review, interviews or onsite reconnaissance activities were performed, in accordance with direction from the client.

## 4.0 AFFECTED ENVIRONMENT

### 4.1 Findings from Data Review

The downtown Dallas area has been developed for over 100 years, and as such, many sites were identified in the database search. Following the site reconnaissance and a review of the data presented in the EDR report, potential sites were ranked either High Risk, Moderate Risk, Low Risk, or Indeterminate Risk, based on the type of listing, distance to the project corridor, topographic gradient, probable pathway for contaminant migration, status of the site, and the history of releases, spills, or violations. Based on these criteria, sites that are located in the vicinity of the proposed corridor, have documented site activities that could contaminate soil or groundwater, or have a history of violations or contaminated media that have a high potential to impact the site. Other sites without a history of violations or leaks or spills and are located on the adjacent properties or beyond, are typically ranked as a Moderate or Low Risk. Orphan sites were not reviewed, due to the large number of non-locatable sites associated with the downtown Dallas area. Only sites with some indication of issues are ranked. Benign properties like office buildings, schools, and parking lots are not provided with a risk ranking, but are assumed to be Low Risk.

A total of over 1,700 hazardous materials listings were located within the ASTM search radius. The number of sites was decreased based on the nature of each database listing, and their location within the 300- or 600-foot buffer (for at-grade versus below-grade improvements, respectively) of the D2 Corridor. Over 340 potential risk sites had listings from databases included in **Table 3-1**, which were considered databases of concern. Sites were eliminated from further consideration, or ranked as Low Risk, if database listings were from "pointer" databases, air emission sites, or had listings for issues such as paperwork violations that do not necessarily lead to a risk of contaminant release.

The site reconnaissance was conducted July 12, 2018. The proximity of a listed site to the proposed D2 Corridor, surface topography, and the information provided in the EDR database search, helped to determine the site's potential risk. **Table 4-1** includes the Low, Moderate, High, and Indeterminate Risk sites to the D2 Corridor. These sites are shown on **Figure 4-1** and **Figure 4-2**.

Of the 344 sites of concern ranked by this protocol, 10 sites are ranked as High Risk, 17 as Moderate Risk, and 77 as Indeterminate Risk (of the Indeterminate Risk sites, 72 were listed in either the EDR Hist Auto or EDR Hist Cleaners databases). The remainder of the sites were ranked as having Low Risk to impact the project corridor. As discussed earlier, this risk classification is based on the nature of the site contamination, proximity to the project corridor, and groundwater flow direction. It is important to note that this risk ranking would be applicable to the corridor area **ONLY** if the ground is disturbed during construction activities. If subsurface soils will not be disturbed during construction, then these sites would not pose a risk to the project corridor. The approximate location and nature of contamination of the identified High and Moderate Risk sites are discussed below.

Figure 4-1. High and Moderate Hazardous Materials Risk Sites

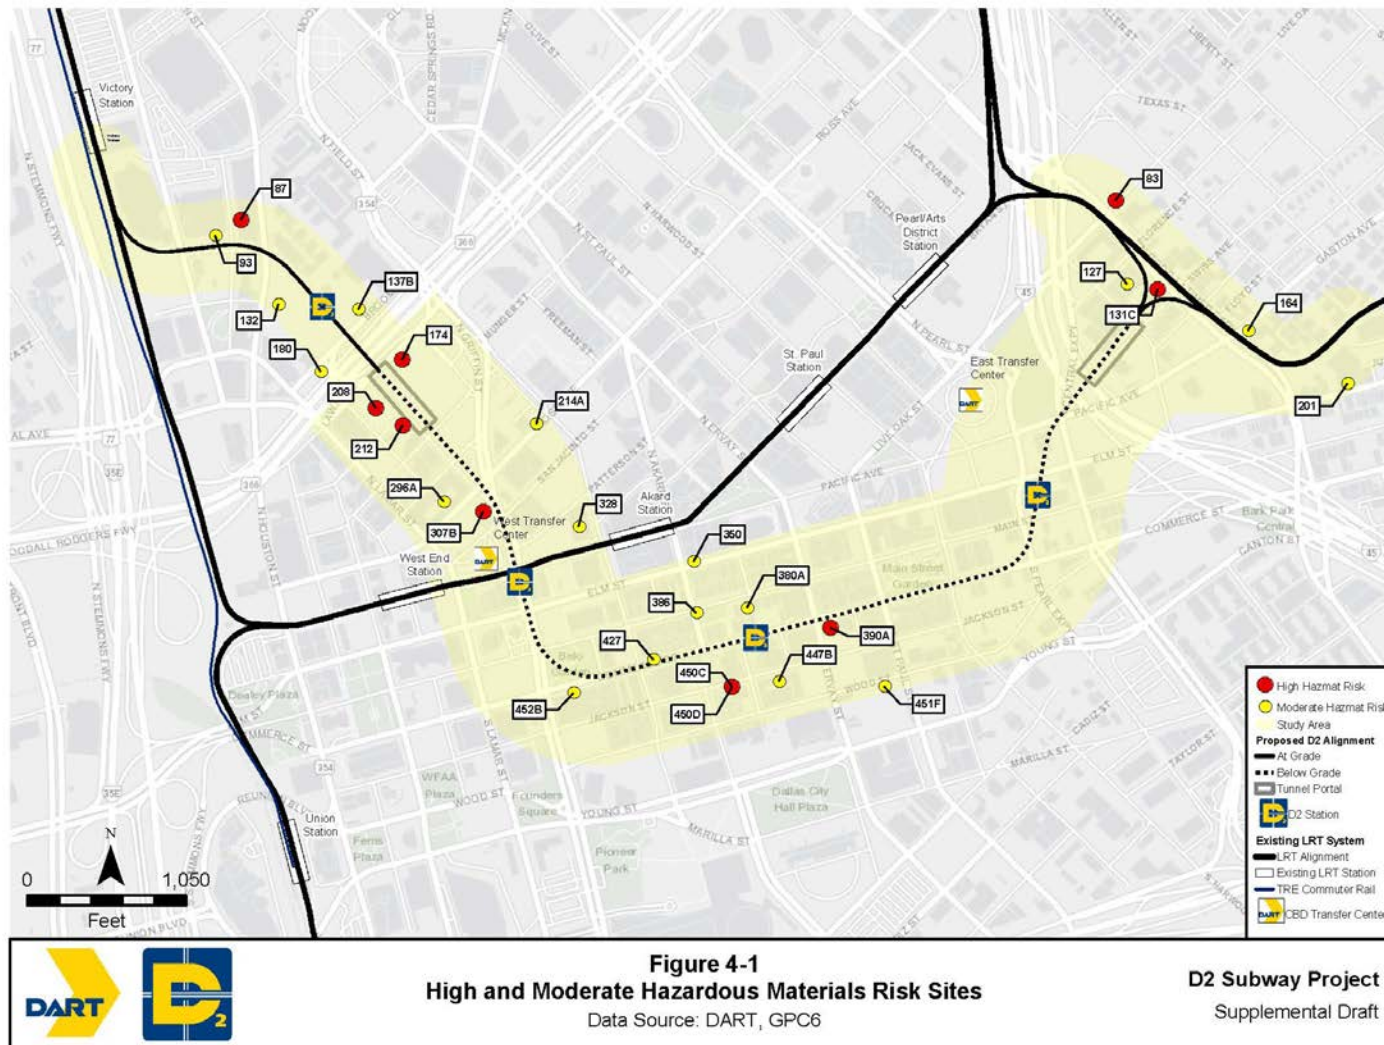

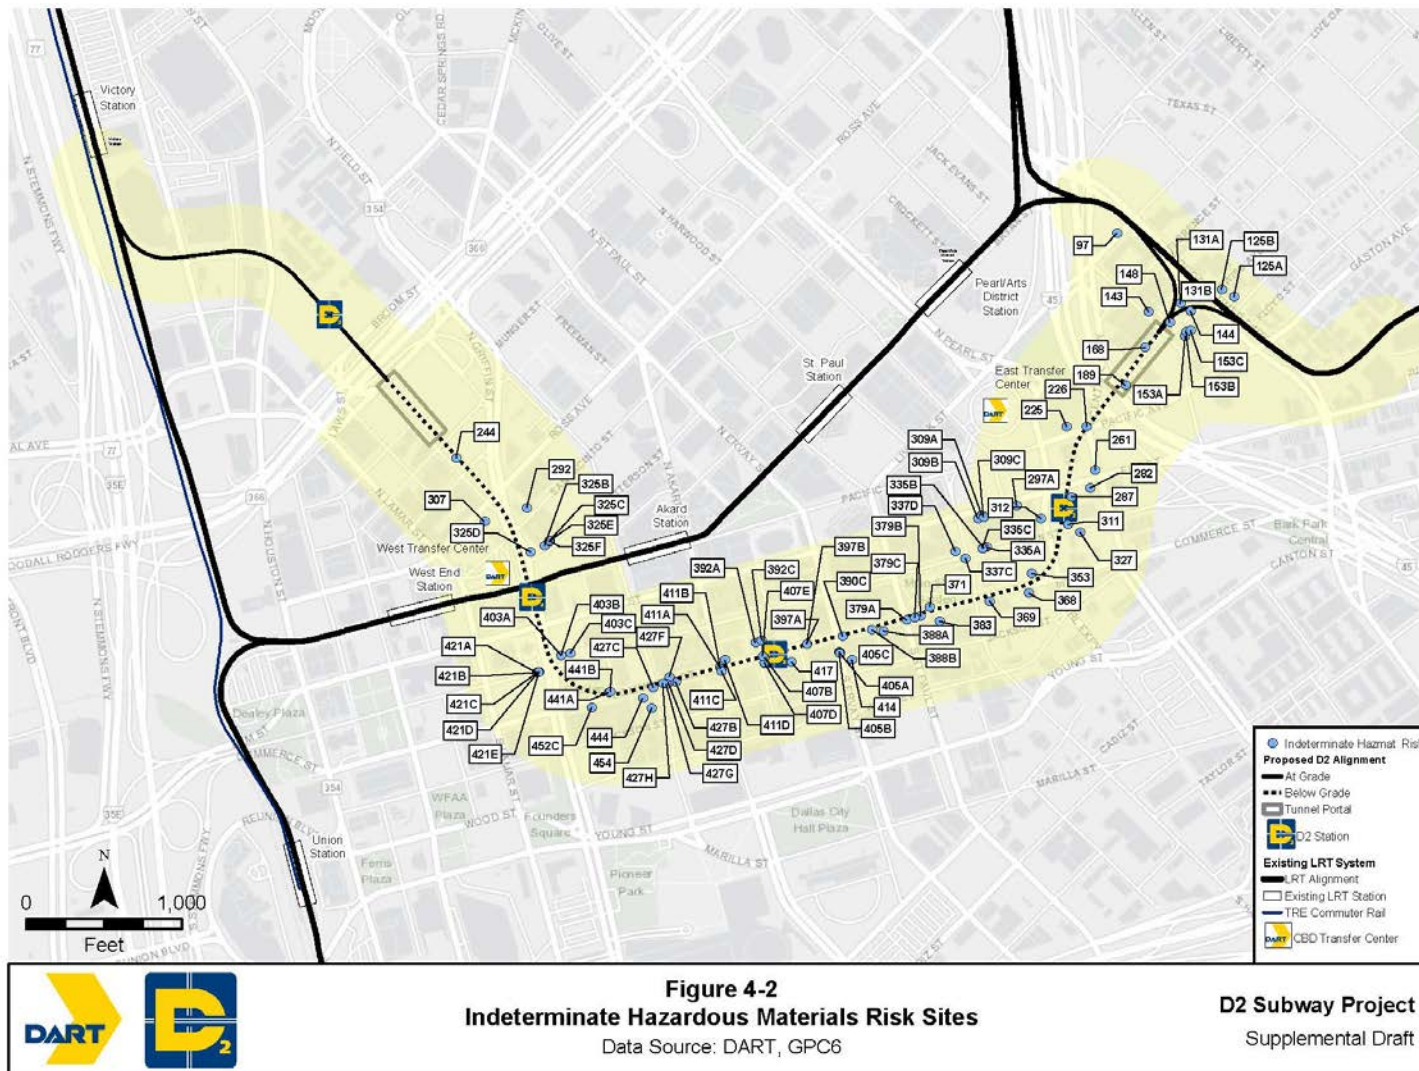

Figure 4-2. Indeterminate Hazardous Materials Risk Sites

### **High Risk Sites**

Ten sites are rated as a High Risk (Map IDs 83, 87, 131C, 174, 208, 212, 307B, 390A, 450C, and 450D). The locations of these sites are shown in red on **Figure 4-1**.

The **City Lights Property/Dallas Can! Academy**, located at 2601 Live Oak St., Map ID 83, was listed in the Voluntary Cleanup Program (VCP), Groundwater Contamination Cases (GCC), Municipal Settings Designation (MSD), and EDR Hist Auto databases. This site is located approximately 145 feet northeast from the far northeast project terminus. According to the EDR report (EDR, 2018), a developer entered the VCP in 2013, and the site is currently listed as being in the investigative phase, to address soils and groundwater contaminated with volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), heavy metals, chlorinated solvents, and total petroleum hydrocarbons (TPH). The site was listed in the GCC database with the same list of contaminants, and had a municipal setting designation (MSD) in 2015 for the contaminants tetrachloroethylene (PCE), 2-methyl naphthalene, and TPH. Because of information provided in the database report, and the distance and direction of the site from the proposed corridor, this site was ranked as High Risk.

The **Dallas Steam Electric Station (and Tuec North B and Tuec North A)**, located west of Alamo Street at 2727 Flynn Street, Map ID 87, included listings in the VCP, GCC and Activity and Use Limitations (AUL) databases. This site is located approximately 170 feet north of proposed at-grade improvements on the western portion of the corridor. In the late 1990s, this property completed the VCP program for soil and groundwater contamination by TPH, SVOCs, and metals. In 1998, the purchaser agreed to accept nonresidential AULs for the property. The site was listed in the GCC database for historic groundwater contamination between 1994 and 2012, and the contaminants described included TPH and SVOCs. This site was ranked as High Risk because of the information provided in the database report, and the site's distance and direction from the proposed D2 improvements.

The **Glenn E. Underwood** property, located at 2529 Swiss Ave., Map ID 131C, was listed in the Texas Underground Storage Tank (UST) and EDR Hist Auto databases. This facility is located adjacent to the proposed project corridor and was listed as inactive in the UST database for three tanks (4,000 gallon, 6,000 gallon, and 8,000 gallon USTs), which were removed from the ground in 1991. This site was also listed in the EDR Hist Auto database as a gasoline service station between 1966 and 1986. Due to close proximity to the proposed project corridor, this site was ranked as a High Risk.

The **LG Magnolia LP property**, located at 1100 McKinney Ave., Map ID 174, was listed in the AUL, VCP, MSD, and GCC databases. This property is located adjacent to the proposed western tunnel entrance for the project. According to the database report (EDR, 2018), the earliest known date of detected contamination was 2007. The property received a certificate of completion through

the VCP in 2007 for addressing soils and groundwater affected by VOCs, SVOCs, metals, TPH, polychlorinated biphenyls (PCBs), and solvents. During the VCP process, the applicants agreed to accept an AUL, with MSD institutional controls. The site's proximity to the corridor and the nature of the database listings resulted in a High Risk ranking.

**Graphic Engraving**, located at 1012 McKinney Ave., Map ID 208, was located approximately 168 feet southwest of the D2 alignment, near the western tunnel entrance. Graphic Engraving was listed in the VCP, MSD and GCC databases. The facility entered the VCP for soil and groundwater affected by VOCs, heavy metals and TPH. The MSD specifically lists trichloroethylene (TCE) and arsenic. **Graphic Engraving** was also listed as Map ID 212, located at 1911 and 2001 N. Griffin St. These properties are located approximately 60 to 170 feet southwest of the proposed western subway tunnel entrance. This site was listed in the Texas Industrial Hazardous Waste Corrective Action (IHW Corr Action) as inactive, in the VCP with a status of "terminated", and the GCC database with 1995 listed as the earliest date of known contamination. Contaminants included spent solvents and metals (EDR, 2018). Because of the site's proximity to the project corridor, and the nature of the database listings, this site was ranked as High Risk.

**7-Eleven**, located at 1010 Ross Ave. (Map ID 307B), is located adjacent to the proposed D2 Corridor. This retail facility was listed in the UST database, and has a 12,000 gallon UST storing diesel fuel, and a 20,000 gallon UST storing gasoline. Because of the active USTs and proximity to proposed improvements, this site was ranked as High Risk.

**1700 Commerce Street**, Map ID 390A was listed as a leaking petroleum storage tank (LPST) case. This property is just over 50 feet south of the proposed subway. The release at this site resulted in impacts to a designated major or minor aquifer. Final concurrence has been issued, and the case is closed. Closure details were not provided in the EDR report, or on the Texas Commission on Environmental Quality's (TCEQ) website. This site was ranked as High Risk because of distance and direction, coupled with the nature of the database listing.

**The AT&T Telephone Facility** (Map ID 450C) and **Six SBC Plaza** (Map ID 450D), were both located at 1410 Jackson St., approximately 275 feet south-southeast of the proposed D2 Corridor. AT&T was listed in the Tier 2 and GCC database. The EDR report (2018) did not report a list of chemicals stored onsite. Gasoline contamination of the groundwater was known as early as 2006. Six SBC Plaza had listings in the UST, LPST and Tier 2 databases. One active 25,000 gallon UST was reported, and the facility also had one 10,000 gallon UST, which was removed from the ground. Chemicals stored, as reported in the Tier 2 database, included diesel fuel #2 and unleaded gasoline. These sites were ranked as High Risk, because of their close proximity to the proposed project corridor, and the nature of the database listings.

### **Moderate Risk Sites**

Seventeen sites were ranked as a Moderate Risk (Map IDs 93, 127, 132, 137B, 164, 180, 201, 214A, 296A, 328, 350, 380A, 386, 427, 447B, 451F, and 452B). The locations of these sites are depicted in yellow on **Figure 4-1**.

The **Houston Street/UP South Property** (Map ID 93), located north of the Woodall Rogers freeway and McKinney Street, was listed in the VCP database. This site is located approximately 70 feet north of the proposed project area. According to the EDR report, the purchaser of the former railyard/railroad track property completed the VCP in 2000 for soils and groundwater contaminated by TPH, metals and polycyclic aromatic hydrocarbons (PAHs). The contaminated materials were excavated and disposed offsite, and nonresidential institutional controls for the property were implemented. This site was ranked as Moderate Risk because it is located near the proposed at-grade improvement area.

**615 N. Good Latimer Expressway** (Map ID 127), located at 2501, 2507, 2511, and 2519 Swiss Ave. was listed in the VCP database. These sites are located approximately 140 feet west of the proposed D2 Corridor. In 2017, the purchaser of these properties completed the VCP for soils contaminated with arsenic, barium and lead. The property received a certificate of completion in 2017. This site was ranked as a Moderate Risk because of the distance and direction from the corridor.

**The Laws Street Development**, Map IDs 132 and 180, located between 2200 and 2225 Laws Street, was listed in the VCP database. This development is located approximately 200 feet southwest of the D2 alignment, near the at-grade portion of the project. This property received a certificate of completion from the VCP for addressing soils and groundwater contaminated with VOCs, SVOCs, metals and TPH. Because of the distance and direction from the corridor, this site was ranked as Moderate Risk.

**Cemark R990016**, Map ID 137B, located at 2219 Summer St., was listed in the LPST and UST database. This site is located approximately 160 feet northeast from the proposed D2 line, near the site of the Perot Museum. An LPST case was opened in 1990, and case files showed that the release had affected groundwater, with no apparent threats or impacts to receptors. Final concurrence was issued, and the case was closed following cleanup activities. Additionally, this site was listed as inactive in the UST database, with one 10,000 gallon tank that was removed from the ground in 1991. Due to the distance from the corridor, this site was ranked as a Moderate Risk.

**The Missouri Pacific Railroad Co.**, Map ID 164, located at 2606 Gaston Ave., was listed in the LPST and UST databases. This site is located approximately 111 feet northeast of the proposed D2 line, at the far eastern end of the project. Two LPST incidents were reported, one in 1993 with soil contamination only, and the second reported in 1995, where the extent of contamination was

defined and groundwater was not affected. Final concurrence was issued in both of these cases, and the cases were closed. One tank, which was permanently filled in place in 1987, was reported in the UST database. This site was ranked as a Moderate Risk due to distance to the project corridor, and because only soils were impacted (in both cases).

The **property located at 2625 Elm Street**, Map ID 201, was listed in the VCP, MSD and GCC databases. This property is located approximately 170 feet southeast from an existing at-grade portion of the D2 alignment, along the far southeastern fork of the corridor. According to the EDR report, in 2012 the site was in the investigation phase of the VCP, and listed in the GCC database for soils and groundwater contaminated by VOCs, SVOCs, heavy metals, chlorinated solvents, and TPH. The site received a MSD in 2016 for contaminants including TPH, vinyl chloride, and trichlorethane, among others. Due to this site's distance and direction from the corridor, this site was ranked as Moderate Risk.

The **Woodall United Investors Property** (Map ID 214A), located at 1305 Ross Ave. and 704 N. Griffin, was listed in the VCP, MSD and GCC databases. This property is located just over 500 feet northeast from the proposed below-grade portion of the D2 alignment. The purchaser of this property completed the VCP in 2008 for soils and groundwater contaminated with VOCs, SVOCs, and metals. The MSD was certified in 2006 and contaminants listed included benzene and TPH. Due to its distance from the D2 Corridor, this site was ranked as a Moderate Risk.

**CVS Pharmacy #8391** (Map ID 296A), located at 1001 Ross Ave., was listed in the LPST, Resource Conservation and Recovery Act (RCRA), and industrial and hazardous waste (IHW) databases. The CVS is located over 260 feet south-southwest of the project corridor. This site reported a LPST in 2005. The assessment of the LPST case was incomplete, but no apparent threats or impacts to receptors were noted. Final concurrence has been issued and the case is closed. This CVS was also listed as a RCRA conditionally exempt small quantity generator (CESQG) of hazardous waste, and was listed in the IHW database. No violations in either of these databases were reported. Due to the distance and direction from the corridor, this site was ranked as a Moderate Risk.

**The Renaissance Tower Parking Garage**, Map ID 328, located at 1201 Pacific Ave. was listed in the Innocent Owner/Operator Program (IOP), VCP and GCC databases. This parking garage is approximately 450 feet east of the proposed D2 Corridor. Based on the database report, the owners terminated their involvement with the IOP and entered the VCP in 2009 for soils and groundwater affected by VOCs and heavy metals. According to the GCC database, the date of earliest known groundwater contamination was in 2007. Due to this site's distance and direction from the corridor, this site was ranked as Moderate Risk.

**The Elm Building**, Map ID 350, located at 1505 Elm Street, was listed in the VCP and GCC databases. This building is located approximately 550 feet north of the proposed D2 Corridor. According to the database report, the facility was terminated by the VCP and the site was then

listed in the GCC database for groundwater contamination between 1994 and 2015. Solvents were listed as the contaminants of concern. Due to the distance between the site and the corridor, this site was ranked as a Moderate Risk.

**The Joule Hotel**, Map ID 380A, located at 1530 Main St., was listed in the VCP database. This facility is located approximately 174 feet north-northwest of the D2 Corridor. The purchaser of the property completed the VCP in 2007 through the Texas Risk Reduction Program (TRRP). TPH contamination of groundwater was caused by a heating oil UST. Due to distance from the proposed project corridor, this site was ranked as a Moderate Risk.

**Pegasus Plaza** (Map ID 386), located at 100 S. Akard St., was listed in the LPST database. Pegasus Plaza is located approximately one block north of the proposed D2 Corridor (about 230 feet). This site reported an LPST case, where groundwater was not affected. The case has been closed. Due to its distance from the project corridor, this site was ranked as Moderate Risk.

**The Adolphus Hotel**, Map ID 427A, located at 1321 Commerce St., was listed in multiple databases, including the IHW, IHW Corr Action, UST, RCRA-CESQG, Enforcement and Compliance History Online (ECHO), and aboveground storage tank (AST) databases. The Adolphus Hotel is located adjacent to the proposed D2 Corridor. The IHW registration has not been updated since 1992, and the IHW Corr Action listing was inactive as of 2014. The facility was listed as active in the UST database; however, the two USTs listed were marked as permanently filled in place in 1979. The hotel reportedly has one 4,000 gallon AST for diesel fuel. No violations were reported in the RCRA or ECHO databases. This site was ranked as Moderate Risk due to its active status in the UST database.

**Trailways** (Map ID 447B), located at 1500 Jackson St., was listed in the LPST and UST databases. This site is located approximately 310 feet south-southeast of the project corridor. One UST was reported, a 12,000 gallon UST which was permanently filled in place in 1991, and an LPST case was reported in 1992. The LPST resulted in groundwater contamination to a source that was not the only reliable source of water in the vicinity (not a Class 1B groundwater). The database report indicated an incomplete site characterization; however, the case has been closed through the remediation program. Due to its distance and direction from the proposed corridor, this site was ranked as a Moderate Risk.

**Commercial parking lot property** (Map ID 451F), located at 1720 Wood Street, was listed in the AUL, VCP, and GCC databases. This parking lot property is located approximately 525 feet south-southeast of the proposed D2 subway. The property completed the VCP in 2013 for groundwater contaminated by chlorinated solvents. A MSD institutional control was placed on the lot based on information in the AUL database. According to the GCC database, contamination by VOCs, heavy metals, and TPH was discovered in 2011. This site was ranked as a Moderate Risk, due to the site's distance and direction from the corridor.

The **General Services Administration**, Map ID 452B, located at 1100 Commerce St., was listed in the UST and LPST databases. This site was located within 70 feet of the proposed D2 Corridor. The site was listed as inactive in the UST database for a 12,000 gallon UST which was removed from the ground. An LPST case in 1995 resulted in contamination that did not affect groundwater. Final concurrence on the LPST case was issued, and the case is closed. This site was ranked as Moderate Risk because the LPST case did not affect groundwater.

### **Indeterminate Risk Sites**

Indeterminate Risk sites are those where more information is needed to determine whether the site would pose a risk to the project. Seventy-seven sites were considered to be of Indeterminate Risk. Seventy-two of those were listed in the EDR Hist Auto and EDR Hist Cleaner database; these include Map IDs: 97, 125B, 131A, 143, 144, 148, 153A, 153B, 153C, 189, 225, 226, 244, 261, 282, 287, 292, 307A, 311, 312, 325B, 325C, 325D, 325E, 325F, 327, 353, 368, 369, 369b, 371, 379A, 379B, 379C, 383A, 388A, 388B, 390C, 392A, 392C, 397A, 397B, 403A, 403B, 403C, 405A, 405B, 405C, 407B, 407D, 407E, 411A, 411B, 411C, 411D, 414, 417, 421A, 421B, 421C, 421D, 421E, 427B, 427C, 427D, 427F, 427G, 427H, 427I, 441A, 441B, and 454. The additional sites considered to be Indeterminate Risk, but not listed in the EDR Hist Auto or EDR Hist Cleaners databases were Map IDs: 125A, 131B, 168, 444, and 452C. These Indeterminate Risk sites were depicted with blue dots on **Figures 4-2**. More information about these sites is listed in **Table 4-1**.

## **4.2 Findings from Site Reconnaissance of Proposed D2 Corridor**

A reconnaissance of the proposed D2 Corridor was conducted on July 12, 2018. Along with a review of the corridor, sites identified during the regulatory database search were visited, as described above, to determine their potential for affecting the corridor. Since the area is the Dallas Central Business District (CBD), much of the area has been redeveloped from its original use. No large-scale areas of staining, trash dumping or other signs of contamination were noted during the site reconnaissance.

It is important to note that the dense, urban development of the corridor includes extensive utility corridors, with excavations and in some cases, pipes and concrete conduit. Given the presence of multiple release sites including VOCs and SVOCs, the possibility is high for vapor intrusion into utility chases or underground spaces. During an ASTM-conforming Phase I ESA, further analysis of this issue may be performed.

## **4.3 Review of City of Dallas Municipal Setting Designations (MSD)**

The City of Dallas MSD was reviewed in January 2019 (COD, 2019) to identify MSD properties adjacent to the proposed alignment. This official state designation is given to properties within the municipality or its extra-territorial jurisdiction certifying that groundwater at the property is not used as potable water, and is prohibited from future use as potable water because the groundwater is contaminated in excess of applicable protective concentration levels. Several MSD

listings, as listed below, were located within the buffer area of the proposed D2 alignment. These sites were also identified in the database search and discussed in more detail in **Section 4.1**.

- 1012 McKinney Avenue – Identified in the database report as Graphics Engraving (Map ID 208), a High Risk property.
- 1100 McKinney Avenue – Identified in the database report as the LG Magnolia property (Map ID 174), a High Risk property.
- 1714 Wood Street – Identified in the database report as Commercial parking lot property (Map ID 451F), a Moderate Risk property.
- 2627 Live Oak Street – Identified in the database report as City Lights Property / Dallas Can! Academy (Map ID 83), a High Risk property.
- 2625 Elm Street – Identified in the database report as the property at 2625 Elm Street (Map ID 201), a Moderate Risk property.

#### 4.4 Conclusions

The D2 Subway Project proposes to add needed capacity and improve system reliability and passenger service through downtown Dallas. This would be accomplished with a new line extending from Victory Park in the west to Deep Ellum in the east, and would be largely a new alignment subway. The purpose of this report is to provide a screening of potential Hazmat issues and sites that could impact the proposed D2 project.

A search of the regulatory databases for sites that handle, generate, transport, store, or dispose of hazardous and/or regulated materials was conducted by Environmental Data Resources, Inc. (EDR) in July 2018. The EDR report was generated for the study area, and reviewed for those sites located within 300 feet of at-grade portions of the alignment and 600 feet of proposed subway components for potential hazardous materials sites. A total of 10 High Risk, 17 Moderate Risk, and 77 Indeterminate Risk sites were identified (see **Table 4-1**). The High or Moderate Risk sites could affect construction if subsurface soil were to be disturbed. Indeterminate Risk sites require more information to determine potential risk to the proposed project. The vast majority, 72 of 77 total, of the Indeterminate Risk sites were identified in the EDR Hist Auto or EDR Hist Cleaner databases as formerly operating an automobile garage or service station or a dry cleaner within close proximity to the proposed line.

Based solely upon the site reconnaissance, no additional hazardous materials concerns were identified.

#### 4.5 Recommendations

From the limited scope of this investigation, the following recommendations are proposed:

- Additional investigation (in the form of ASTM-conforming Phase I ESAs) is warranted for sites identified as High Risk, Moderate Risk, or Indeterminate Risk.

- Once design progresses, DART or their contractor should determine where subsurface soils will be disturbed during construction, and determine their proximity to High Risk, Moderate Risk, or Indeterminate Risk sites. From this more specific information, investigative efforts (Phase IIs) can be refined to focus on areas within the construction prism that are most likely to intercept contaminated areas. Based upon the results of Phase II sampling and analysis, a Contaminated Media Management Plan may be developed, which would guide appropriate response actions during construction.
- Due to the dozens of former gas stations and drycleaners that have operated in the downtown area, contamination from VOCs, SVOCs, metals, and chlorinated solvents could occur almost anywhere along the project corridor. Therefore, contractors should be prepared to encounter potentially hazardous conditions at any time. Specifically, when working in proximity to High or Moderate risk sites, contractors should have appropriately-trained staff (environmental consulting and remediation expertise) available during all ground-disturbing activities. Proper equipment and processes shall be available to protect workers, the public, and the environment if hazardous materials are encountered.

## 5.0 ACRONYMS AND ABBREVIATIONS

AAI	All Appropriate Inquires
ASTM	American Society for Testing and Materials
AUL	Activity and Use Limitation
CAA	Clean Air Act
CERCLA	Comprehensive Environmental Response, Compensation, and Liability Act
CESQG	Conditionally Exempt Small Quantity Generator
CLI	Closed and Abandoned Landfills
COD	City of Dallas
CORRACTS	RCRA Corrective Action
CWA	Clean Water Act
DART	Dallas Area Rapid Transit
ECHO	EPA Enforcement and Compliance History Online
EDR	Environmental Data Resources, Inc.
ERNS	Emergency Response Notification System
ESA	Environmental Site Assessment
FIFRA	Federal Insecticide, Fungicide and Rodenticide Act
FTTS	FIFRA/TSCA Tracking System
GCC	Groundwater Contamination Cases
Hazmat	Hazardous and Regulated Materials
HMIRS	Hazardous Material Information Resource System
IHW	Industrial Hazardous Waste
IOP	Innocent Owner/Operator Program
LQG	Large Quantity Generator
LPST	Leaking Petroleum Storage Tank
MLTS	Material Licensing Tracking System
MSD	Municipal Setting Designations

## **TABLES**

**Table 3-1  
Environmental Databases Provided by EDR**

<b>Database Name</b> (BOLD TYPE denotes databases of enhanced importance relative to releases)	<b>Database Description</b>	<b>Number of Listings Within the ASTM Search Radius*</b>
<b>SEMS</b>	Tracks hazardous waste sites, potentially hazardous waste sites and remedial activities performed in support of EPA's Superfund Program.	0
<b>SEMS – ARCHIVE</b>	Tracks sites with no further interest under the Federal Superfund Program, based on available information.	1
<b>CORRACTS</b>	Identifies hazardous waste handlers with RCRA corrective action activity.	0
<b>RCRA – TSDF</b>	Selective information from the Resource Conservation and Recovery Act (RCRA) sites. TSDF includes sites which store, treat and or dispose of hazardous waste.	0
<b>RCRA – LQG</b>	Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.	0
<b>RCRA – SQG</b>	Small quantity generators (SQGs) generate between 100 and 1,000 kg of hazardous waste per month.	0
<b>RCRA – CESQG</b>	Conditionally exempt SQGs generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.	9
<b>RCRA NonGen / NLR</b>	Non-generators do not presently generate hazardous waste.	50
<b>ERNS</b>	The Emergency Response Notification System (ERNS) records and stores information on reported releases of oil and hazardous substances.	21
<b>HMIRS</b>	The Hazardous Materials Information Reporting System contains hazardous material spill incidents reported to the Department of Transportation (DOT).	3
<b>BROWNFIELDS</b>	The EPA's listing of Brownfields properties from the Cleanups in My Community program.	1
<b>TSCA</b>	The Toxic Substances Control Act identifies manufacturers and importers of chemicals included on the TSCA Chemical Substance Inventory list.	2
<b>TRIS</b>	The Toxic Chemical Release Inventory System identifies facilities which release toxic chemicals to the air, water and land in reportable quantities.	0
<b>FTTS</b>	This database tracts administrative cases, pesticide enforcement actions and compliance activities.	12
<b>HIST FTTS</b>	This is a historical database which may include some records not included in the newer FTTS database.	11
<b>SSTS</b>	Record of the types and amounts of pesticides, active ingredients and devices being produced, sold or distributed within the past year.	1

**Table 3-1  
Environmental Databases Provided by EDR**

<b>Database Name</b> (BOLD TYPE denotes databases of enhanced importance relative to releases)	<b>Database Description</b>	<b>Number of Listings Within the ASTM Search Radius*</b>
ICIS	The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.	22
<b>PADS</b>	The PCB Activity Database System identifies generators, transporters, commercial storers and/or brokers and disposers of PCBs.	0
MLTS	The Material Licensing Tracking System, maintained by the Nuclear Regulatory Commission, lists sites which possess or use radioactive materials.	5
RADINFO	Information about facilities which are regulated by EPA regulations for radiation and radioactivity.	0
ECHO	Provides integrated compliance and enforcement information.	85
<b>TX IOP</b>	Information on innocent owners or operators whose property is contaminated as a result of a release or migration of contaminants from a source or sources not located on the property, and they did not cause or contribute to contamination.	8
<b>TX SWF/LF</b>	Inventory of solid waste disposal facilities or landfills.	0
<b>TX CLI</b>	Closed and abandoned landfills (permitted as well as unauthorized).	0
<b>TX SWRCY</b>	Recycling facilities.	0
<b>TX LPST</b>	An inventory of reported leaking petroleum storage tank incidents.	36
<b>TX UST</b>	Registered underground storage tanks.	74
<b>TX AST</b>	Registered aboveground storage tanks.	11
<b>TX SPILLS</b>	Spills reported to the Emergency Response Division.	28
<b>TX AUL</b>	Sites with activity and use limitations including both engineering controls and institutional controls.	18
<b>TX VCP</b>	The Voluntary Cleanup Program was established to provide administrative, technical and legal incentives to encourage the cleanup of contaminated sites.	58
<b>TX PRIORITYCLEANERS</b>	A listing of dry cleaner related contaminated sites.	1
<b>TX DRYCLEANERS</b>	A listing of dry cleaning facilities.	8
<b>TX BROWNFIELDS</b>	Brownfield site assessments that are being cleaned up under EPA grant monies.	1
<b>TX ENF</b>	A listing of permit violations.	2
<b>TX Ind. Haz Waste</b>	Summary reports reported by waste handlers, generators and shippers.	60
TX TIER 2	A listing of facilities which store or manufacture hazardous materials and submit a chemical inventory report.	97

**Table 3-1  
Environmental Databases Provided by EDR**

<b>Database Name</b> (BOLD TYPE denotes databases of enhanced importance relative to releases)	<b>Database Description</b>	<b>Number of Listings Within the ASTM Search Radius*</b>
<b>TX MSD</b>	This is an official designation given to properties which certifies the groundwater at the property is not to be used as potable water because the groundwater is contaminated.	9
<b>TX IHW CORR ACTION</b>	Industrial hazardous waste facilities with corrective actions.	7
<b>TX GCC</b>	The Groundwater Contamination Cases database includes status of groundwater monitoring activities, description of groundwater contamination cases reported during the year, and a record of incomplete clean up action.	36
TX ASBESTOS	Listing of asbestos notification site locations.	80
<b>EDR Hist Auto</b>	Listings of potential gas station/filling station/service station sites that were available to EDR researchers.	534
<b>EDR Hist Cleaner</b>	Listings of potential dry cleaner sites that were available to EDR researchers.	199
* This column includes all the listings which were in the EDR database search, including those that were more than our 300 ft. (surrounding proposed at-grade improvements) or 600 ft. (surrounding proposed below-grade improvements) buffer, which was outside the Study Area for the project.		

**Table 4-1  
Hazardous Materials Sites and Risk Ranking\***

Map ID (EDR Site Identification)	Site Name	Address	Databases of Concern	Approximate Distance / Direction of Site from D2	Comments	Risk Level
73	Clark Auto	2625 Live Oak St., Dallas, TX	UST	289' NE	This facility was inactive for two 1,000 gallon gasoline USTs which were removed from the ground in 1998.	Low
83	City Lights Property / Dallas Can! Academy / Carter's Service Station	2601 Live Oak St., Dallas, TX	VCP, GCC, TX MSD, Hist Auto	146' NE	In 2013, a multifamily developer entered the VCP for the property to address soils and groundwater contaminated with VOCs, SVOCs, heavy metals, chlorinated solvents and TPH. The VCP is listed as being in the investigation phase. The GCC database also listed the same contaminants of concern, with a date of earliest known contamination of 2013. This site was listed in the MSD database in 2015 for the contaminants tetrachloroethylene, 2-methyl naphthalene and TPH. This site had violations related to asbestos in schools, and was also identified as a service station in the Hist Auto database listed in 1930.	High
84	Kenniebrew Tailoring Co.	709 N. Central	EDR Hist Cleaners	259' WNW	A clothes cleaner and dyer operating in 1925.	Low
87	Tuec North B and Tuec North A / Dallas Steam Electric	West of Alamo St./ 2727 Flynn St., Dallas, TX	AUL, VCP, GCC	172' N	The Dallas Steam Electric Station completed the VCP in 1996 for soils and groundwater contaminated by TPH and SVOCs. Affected materials were moved offsite to a landfill. In 1999, this facility	High

**Table 4-1  
Hazardous Materials Sites and Risk Ranking\***

Map ID (EDR Site Identification)	Site Name	Address	Databases of Concern	Approximate Distance / Direction of Site from D2	Comments	Risk Level
					received a certificate of completion from the VCP for excavation and offsite disposal of soils and groundwater affected by petroleum hydrocarbons and metals. The purchaser accepted a non-residential AUL in 1998. This facility was listed in the GCC database for historic groundwater contamination from 1994-2012. TPH and SVOCs were the contaminants described.	
91	Gulf Harbour Commerce	2408 Victory Park Ln., Dallas, TX	Hist Auto	88' N	A gasoline service station in 2010-2014. Google Earth photos for this time period indicate that the site had been redeveloped as a multi-use building.	Low
93	Houston Street / UP South Property	North of Woodall Rodgers/McKinney	TX VCP	70' N	The purchaser of this railyard/railroad track property completed the VCP in 2000, for soils and groundwater contaminated with TPH, metals and PAH. The remedy listed was excavation and disposal, and non-residential institutional controls were implemented.	Moderate, due to at-grade proposed improvement in the area
97	Mack's Service Station	2525 Live Oak	EDR Hist Auto	89' W	This location was listed under multiple names as a gasoline and oil service station/automobile repairer. Years of operation were sporadic between 1930 and 1961.	Indeterminate

**Table 4-1  
Hazardous Materials Sites and Risk Ranking\***

Map ID (EDR Site Identification)	Site Name	Address	Databases of Concern	Approximate Distance / Direction of Site from D2	Comments	Risk Level
105	Renegade Oil Co. Inc.	1313 River Street, Dallas, TX	Hist Auto	260' NE	A petroleum products facility between 1973 and 1982.	Low
106	Gypsum Supply	2331 Summer Street, Dallas, TX	UST	168' N	Listed as inactive for a 500 gallon UST which was removed from the ground in 1996.	Low
114	JW Campbell & Associates	2616 Swiss Ave., Dallas, TX	UST	200' NE	Listed as inactive for one UST which was permanently filled in place in 1987.	Low
123	American Rug Services	2312 & 2320 Griffin St., Dallas, TX	Hist Cleaner	Adjacent SW	A carpet and rug cleaner and renovating between 1951 and 1961.	Low – proposed at-grade facility, redeveloped area, and gradient is away from the proposed line.
	Cosden Tower Service	2311 Griffin St., Dallas, TX	Hist Auto	Adjacent SW	A gasoline station in 1961.	Low – proposed at-grade facility, redeveloped area, and gradient is away from the proposed line.
125A	Giddings and Wells Paint and Body Shop	2606 Swiss Ave., Dallas, TX	Hist Auto, IHW, RCRA	90' E	A non-generator of waste and a former small quantity generator. No violations were listed in the IHW or RCRA	Indeterminate

Map ID (EDR Site Identification)	Site Name	Address	Databases of Concern	Approximate Distance / Direction of Site from D2	Comments	Risk Level
189	Long Super Service Station / Barney Google Garage	2300 & 2305 Swiss Ave.	EDR Hist Auto	47' S	The Barney Google Garage was listed for automobile repairing in 1951, and a gasoline and oil service station was listed at the location of Long Super Service Station in 1930 and 1936.	Indeterminate
194	Alf H. Woodruff	2106 Live Oak	EDR Hist Auto	595' NW	This facility was listed for automobile repairing in 1946.	Low due to distance
197	Edwards & Ballard	910 McKinney Ave.	EDR Hist Auto	267' SW	A gasoline and oil service station in 1941.	Low
	Warehouse	1006 McKinney Ave.	UST	208' SW	Listed as inactive in the database for one 2,000 gallon gasoline UST which was removed from the ground in 1993.	Low
201	2625 Elm Street	2625 Elm St.	VCP, MSD, GCC	168' SE	In 2012, this site was in the investigation phase of the VCP, and was listed in the GCC database for soils and groundwater affected by VOCs, SVOCs, heavy metals, chlorinated solvents, and TPH. In 2016, a MSD was certified for the site for contaminants including TPH, vinyl chloride and trichloroethane, among others.	Moderate due to distance and direction.
203	Not listed	2500 Pacific Ave.	HMIRS	585' SE	Approximately two gallons of corrosive liquids leaked from a carton during unloading. The customer called a response team to handle the cleanup.	Low

**Table 4-1  
Hazardous Materials Sites and Risk Ranking\***

Map ID (EDR Site Identification)	Site Name	Address	Databases of Concern	Approximate Distance / Direction of Site from D2	Comments	Risk Level
205	Eubanks & Ballard	304 N. Central Ave.	EDR Hist Cleaners	200' SE	Listed as a historical clothes cleaner and dyer for year 1925.	Low
208	Graphics Engraving Facility	1012 McKinney Ave.	VCP, MSD, GCC	168' SW	In 2014 a GCC case was reported for the property. The facility entered the VCP for soil and groundwater affected by VOCs, heavy metals and TPH. The contaminants trichloroethylene and arsenic are listed in the MSD.	High
212	Graphics Engraving	1911 & 2001 N. Griffin St.	TX IHW Corr Action, VCP, GCC	66-112' SW	As of 1995, this facility was listed as inactive in the IHW Corr Action database. The facility entered the VCP in 1995 for soils and groundwater affected by spent solvents and metals. The phase of the VCP is listed as "terminated." The facility is listed in the GCC database with date of earliest known contamination listed as 1995.	High
213	212 N. Good-Latimer, Dallas	212 N. Good-Latimer, Dallas	Spills	200' S	Approximately 100 gallons of diesel fuel spilled in 1993. According to the report, no waterways were affected.	Low
	Dal Worth Shippers Assn.	212 N. Good Latimer Expy.	UST	200' S	Dal Worth Shippers Assn. reported two active USTs for fleet refueling. The capacity of the tanks were not listed, but one was for gasoline and one was for diesel fuel.	Low

**Table 4-1  
Hazardous Materials Sites and Risk Ranking\***

Map ID (EDR Site Identification)	Site Name	Address	Databases of Concern	Approximate Distance / Direction of Site from D2	Comments	Risk Level
214A	Woodall United Investors Property	1305 Ross Ave. & 704 N. Griffin	VCP, MSD, GCC	506' NE	The purchaser of this property completed the VCP in 2008, for soils and groundwater contaminated with VOCs, SVOCs, and metals. The date of earliest known contamination for the GCC was listed as December 2005, and the MSD certification was listed as December 2006. Contaminants included benzene and TPH.	Moderate due to distance.
214B	Callaway S. Tank Car Service Station No. 1 / American Radiator Service	1313 & 1315 Ross Ave.	EDR Hist Auto	564' NE	Callaway's was listed as a gasoline and oil service station in 1936, and American Radiator Service was listed as an automobile radiator repairer in 1966.	Low due to distance
224	Ireland S Auto Service / Owl Garage	315 & 316 Olive	EDR Hist Auto	458' NW	These facilities were listed as automobile repairers with dates between 1925 and 1951.	Low due to distance
225	Smith & Williams	2211 N. Pacific Ave.	EDR Hist Auto	On alignment	Listed as an automobile repairing station in 1951.	Indeterminate. This lot has been redeveloped as a park; however, the below-grade alignment would surface

Map ID (EDR Site Identification)	Site Name	Address	Databases of Concern	Approximate Distance / Direction of Site from D2	Comments	Risk Level
442	Harris Auto Service	1600 Jackson St.	EDR Hist Auto	307' SSE	An automobile garage and repair facility under multiple names (Magnolia Garage and Staten Auto Co.) between 1930 and 1951.	Low
442	Parking Company of America	1600 Jackson St.	LPST, UST	307' SSE	An LPST case was reported in 1990. The LPST resulted in soil contamination only and required a full remedial action plan. Final concurrence on the LPST case has been issued and the case is closed. Parking Company of America was listed as inactive in the UST database for tank of unreported quantity, which was removed from the ground in 1990.	Low – soil contamination only and distance and direction of impact
443	Lone Star Energy, Adjacent to Southwest Medical Center	Lone Star Energy, Adjacent to Southwest Medical Center	TX SPILLS	484' SSE	Lone Star Energy was responsible for a spill of approximately 20 gallons of diesel fuel in 1993 but did not affect any water resources.	Low
444	Manor House Apartments	1222 Commerce St.	FTTS, ICIS	45' SSE	A landlord/rental facility which had a violation. The ICIS database indicated the facility received a notice of noncompliance and was issued an administrative informal enforcement.	Indeterminate
445	Two SBC Plaza - T44118	211 S. Akard St.	Tier 2	120' SSE	Storage of sulfuric acid and lead in the battery room.	Low
447A	Jefferson Hotel Auto Storage	1512 Jackson St.	EDR Hist Auto	293' SSE	An automobile garage in 1946.	Low

**Table 4-1  
Hazardous Materials Sites and Risk Ranking\***

Map ID (EDR Site Identification)	Site Name	Address	Databases of Concern	Approximate Distance / Direction of Site from D2	Comments	Risk Level
447B	Trailways	1500 Jackson St.	LPST, UST, TX Asbestos	310' SSE	This site is inactive in the UST database for one 12,000 gallon diesel UST that was permanently filled in place in 1991. An LPST case reportedly started in 1992 and resulted in impacted groundwater with an incomplete site characterization. Final concurrence has been issued, and the case is closed. The site (now a tattoo parlor) was in the Asbestos database for a routine inspection in 2016.	Moderate
448	Interurban Tailors	311 Browder	EDR Hist Cleaner	276' SSE	A clothes cleaner and dyer operating in 1925.	Low
450A	Walter Nob Auto Storage / Walter Nob Baker Hotel Garage	1410, 1412, 1414, 1416, & 1420 Jackson St.	EDR Hist Auto	267'- 276' SSE	An automobile garage with dates of operation listed as 1930, 1936, 1941, and 1961.	Low
450B	Magnolia Petroleum Co. Automobile Filling Stations	1418 Jackson St.	EDR Hist Auto	264' SSE	An automobile service station in 1930 and listed as Walter Nob Service Station in 1941.	Low
450C	AT&T Telephone Facility	1410 Jackson St.	Tier 2, GCC	276' SSE	This facility reported to the Tier 2 database in 2006, but information on chemicals stored was not reported. This facility was reported in the GCC database for gasoline contamination of groundwater. The date of earliest	High

**Table 4-1  
Hazardous Materials Sites and Risk Ranking\***

Map ID (EDR Site Identification)	Site Name	Address	Databases of Concern	Approximate Distance / Direction of Site from D2	Comments	Risk Level
					known contamination was listed as March of 2006.	
450D	Six SBC Plaza - T44121	1410 Jackson St.	UST, LPST, Tier 2	276' SSE	This facility is listed as active in the UST database with one 25,000 gallon UST in use. The UST stores both gasoline and diesel. The facility also listed one 10,000 gallon gasoline UST which was removed from the ground in 2005. An LPST case, in which groundwater was affected, was reported in 2005. No apparent threats or impacts to receptors occurred. Final concurrence has been issued and the case is closed. SBC was listed in the Tier 2 database for storing chemicals including diesel fuel #2 and unleaded gasoline. This facility passed all validation checks.	High
451A	Coin Clean Center #2 Inc.	1712 to 1720 Wood St.	EDR Hist Cleaner	524' SSE	This facility was listed as a power laundry, family and commercial under the name Oriental Laundry Co. in 1969 and 1970, and as a dry cleaner (Coin Clean Center #2) in 1971.	Low
451B	Oriental Laundry	1714, 1716, 1718, 1720, 1722, 1724, & 1726 Wood St.	EDR Hist Cleaner	519' SSE	A dry cleaner, cleaner, dyer, presser, repairer, and laundry between 1925 and 1961.	Low

**Table 4-1  
Hazardous Materials Sites and Risk Ranking\***

Map ID (EDR Site Identification)	Site Name	Address	Databases of Concern	Approximate Distance / Direction of Site from D2	Comments	Risk Level
451C	Lone Star Garage and Storage	1728 Wood St.	EDR Hist Auto	534' SSE	Identified under several names as a garage and automobile repair facility between 1930 and 1946.	Low
451D	Clay C. Scott Garage	1710 Wood St.	EDR Hist Auto	526' SSE	An automobile garage and repair shop was listed at this address as Wood Street Garage (1930 and 1936) and then as Scott Clay Garage in 1946 and 1951.	Low
451E	Wood Street Garage	1712 Wood St.	EDR Hist Auto	525' SSE	A garage operating in 1930.	Low
451F	Commercial Parking Lot Property	1720 Wood St.	AUL, VCP, GCC	525' SSE	This property completed the VCP in 2013 for groundwater contaminated by chlorinated solvents. A MSD institutional control was placed on the lot. The site was listed in the GCC database for earliest known contamination in 2011 and groundwater affected by VOCs, heavy metals and TPH. The site is identified in the AUL database as having an MSD.	Moderate
452A	Earle Cabell FB	1100 Commerce St.	TX Asbestos	68' SSW	A notification of asbestos abatement was made in 2017.	Low
452B	General Services Administration	1100 Commerce St.	LPST, UST, TX Asbestos	68' SSW	Listed as inactive in the UST database for one 12,000 gallon diesel tank for fleet refueling, which was removed from the ground in 1999. According to the database listing, the LPST case	Moderate

**Table 4-1  
Hazardous Materials Sites and Risk Ranking\***

Map ID (EDR Site Identification)	Site Name	Address	Databases of Concern	Approximate Distance / Direction of Site from D2	Comments	Risk Level
					started in 1995, and the vertical and horizontal extent of contamination was defined and no groundwater impact occurred. Final concurrence has been issued, and the case is closed. In 2017, notification of asbestos abatement was reported.	
452C	Department of the Army	1114 Commerce St.	MLTS	41' SSW	The facility does not store material, redistribute, incinerate or bury radioactive material on site. The last inspection was in 1988.	Indeterminate
453	J.L. Garcia	315 S. Ervay	EDR Hist Cleaner	404' SSE	This facility was identified as a clothes cleaner and dyer operating in 1925.	Low
454	Lone Star Service Station	1208 Commerce St.	EDR Hist Auto	122' SSE	A gasoline and oil service station operating from 1930 to 1946.	Indeterminate
455	St. George Tailor Shop	1015 Commerce St.	EDR Hist Cleaner	200' SSW	A clothes cleaner, presser and repairer in 1930.	Low
459	Five SBC Plaza T44005	301 S. Akard St.	Tier 2, AST, UST	313' SSE	Listed in the Tier 2 database for storing diesel fuel #2; this facility had passed all validation checks. This facility reported one 1,500 gallon AST in use storing diesel fuel and three 20,000 gallon USTs storing diesel fuel, which were in use for emergency power generation. They also reported one 10,000 gallon UST for	Low

Hazardous Materials Sites and Risk Ranking\***

Map ID (EDR Site Identification)	Site Name	Address	Databases of Concern	Approximate Distance / Direction of Site from D2	Comments	Risk Level
					diesel, which was removed from the ground in 1999.	
459	Exchange Cleaners	305 S. Akard St.	EDR Hist Cleaner	314' SSE	A clothes cleaner, presser and repairer in 1941.	Low
459	Hunter Storage	1318 Jackson St.	EDR Hist Auto	269' SSE	An automobile garage in 1941.	Low
459	Santa Fe Garage	1323 Jackson St.	EDR Hist Auto	229' SSE	An automobile garage in 1930.	Low
459	Zip 60 Minute Cleaners	303 S. Akard St.	EDR Hist Cleaner	313' SSE	Baker Press Shop was reportedly a clothes cleaner and dyer operating at this location in 1925.	Low
460	Isadore Witebsky	423 S. Ervay St.	EDR Hist Cleaner	567' SSE	This location was listed as a clothes presser, cleaner and repairer in 1930.	Low
460	Ervay Street Garage	405 S. Ervay St.	EDR Hist Auto	499' SSE	With three names (also including Hardy S Garage, Diamond Auto Storage), this facility was reported active between 1930 and 1936.	Low
460	Diamond Auto Storage	407 S. Ervay St.	EDR Hist Auto	508' SSE	An automobile garage in 1930.	Low
460	Corner Service Station	430 S. Ervay St.	EDR Hist Auto	600' SSE	A gasoline and oil service station in 1941.	Low
461	AT&T Three Bell Plaza Building	308 S. Akard St.	TX Asbestos, IHW	361' SSE	In 2017, this facility submitted a notification for abatement work. AT&T at this location was listed as a non-industrial CESQG with a variety of waste	Low

**Table 4-1  
Hazardous Materials Sites and Risk Ranking\***

					streams from maintenance and renovation to cleaning.	
461	Southwestern Bell Telephone Facility	308 S. Akard St.	ICIS, Tier 2	361' SSE	Southwestern Bell received an administrative formal enforcement action in 1999.	Low
461	Three SBC Plaza	308 S. Akard St.	Tier 2, ECHO	361' SSE	This facility was listed in the Tier 2 database for storing chemicals including lead and sulfuric acid. All validation checks were passed. No violations were identified in the ECHO database.	Low
461	3 Bell Plaza	308 S. Akard St.	UST	361' SSE	This facility was inactive with four 4,800 gallon UST for diesel, which were permanently filled in place in 1997.	Low
461	Southwestern Bell Telephone Company	308 S. Akard St.	RCRA NonGen / NLR	361' SSE	As of 2003, SBC was not a generator of hazardous waste, and they were historically considered a small quantity generator. No violations were identified in the RCRA database.	Low
463	Simons Garage	1300, 1308 & 1310 Jackson St.	EDR Hist Auto	299' SSE	The Baker Hotel Garage/Simons Garage was an automobile garage and repair shop operating between 1930 and 1966.	Low
464	Andy's Garage	1508 Wood St.	EDR Hist Auto	506' SSE	An automobile repairer operating in 1946.	Low
466	Four (4) AT&T Plaza Building – 6 <sup>th</sup> & 9 <sup>th</sup> Floor	311 S. Akard St.	TX Asbestos	407' SSE	In 2017 and 2018, AT&T Plaza issued notifications for abatement work.	Low

**Table 4-1  
Hazardous Materials Sites and Risk Ranking\***

Map ID (EDR Site Identification)	Site Name	Address	Databases of Concern	Approximate Distance / Direction of Site from D2	Comments	Risk Level
467	Classified Parking Garage	1407 Wood St.	EDR Hist Auto	470' SSE	An automobile repairing facility in 1941.	Low
471	Jackson Street Garage	1018 - 1102 Jackson St.	EDR Hist Auto	269' S-SSW	An automobile garage with dates of operation between 1925 to 1930	Low
471	Santa Fe Auto Storage	1108 Jackson St.	EDR Hist Auto	298' SSE	An automobile garage in business in 1936.	Low
477	Tugwell Automotive Service	1002 Jackson St.	EDR Hist Auto	382' SSW	An automobile repairing facility was identified at this location under two names, Tugwell Automotive Service in 1936 and Warren Malcolm in 1941.	Low
478	Databank Dallas	400 S. Akard St. Stes. 100 & 310	AST	595' SSE	Listed as active for several tanks containing diesel. One 1,800 gallon AST, four 5,000 gallon, two 4,000 gallon and one 3,600 gallon ASTs were listed. Another listing indicated six active ASTs, two 5,000 gallon, two 3,400 gallon and two 3,800 gallon capacity.	Low
478	Dallas Carrier Center	400 S. Akard St.	UST	595' SSE	Listed as an active retail facility; however, the only tank listed was a 7,000 gallon diesel UST which was removed from the ground in 1999.	Low
478	S. Waddell Service Station	1400 Young	EDR Hist Auto	595' SSE	A gasoline and oil service station in 1936.	Low
478	Level 3 - Dallas - DLLSTXLD	400 S Akard – Carrier Central	Tier 2	595' SSE	This facility reported to the Tier 2 database for storing diesel fuel, sulfuric acid and lead.	Low

**Table 4-1  
Hazardous Materials Sites and Risk Ranking\***

Map ID (EDR Site Identification)	Site Name	Address	Databases of Concern	Approximate Distance / Direction of Site from D2	Comments	Risk Level
479	Watson & Caldwell	419 S. Akard St.	EDR Hist Auto	567' S	This automobile repairer had operations between 1936 and 1946.	Low
482	Doc Jackson Garage	1016 & 1100 Jackson St.	EDR Hist Auto	389' S	An automobile garage with dates between 1936 and 1951.	Low
482	MIDW10	1100 Jackson St.	UST	404' SSW	Listed as inactive with two 8,000 gallon USTs removed from the ground in 1990. The contents of the tank were not reported.	Low
487	Wood Street Garage	1200 Wood St.	EDR Hist Auto	509' SSE	An automobile garage in 1925.	Low
492	Vacant Building	1002 Wood St.	TX Asbestos	541' S	In 2017 this facility amended a notification regarding abatement/demolition work.	Low

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## EXECUTIVE SUMMARY

### FEDERAL RECORDS

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 05/18/2018 has revealed that there is 1 SEMS-ARCHIVE site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>
<b>CONSOLIDATED CASTING</b>	<b>2425 CAROLINE ST</b>	<b>20</b>	<b>71</b>

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 9 RCRA-CESQG sites within the searched area.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/01/2018 has revealed that there are 50 RCRA NonGen / NLR sites within the searched area.

## EXECUTIVE SUMMARY

TSCA: The Toxic Substances Control Act identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site. The United States Environmental Protection Agency has no current plan to update and/or re-issue this database.

A review of the TSCA list, as provided by EDR, and dated 12/31/2016 has revealed that there are 2 TSCA sites within the searched area.

## EXECUTIVE SUMMARY

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

A review of the HIST FTTS list, as provided by EDR, has revealed that there are 11 HIST FTTS sites within the searched area.

SSTS: Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

A review of the SSTS list, as provided by EDR, and dated 12/31/2009 has revealed that there is 1 SSTS site within the searched area.

ABANDONED MINES: An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

A review of the ABANDONED MINES list, as provided by EDR, and dated 03/08/2018 has revealed that there is 1 ABANDONED MINES site within the searched area.

US AIRS: The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

A review of the US AIRS list, as provided by EDR, has revealed that there is 1 US AIRS site within

TX GCC: Texas Water Code, Section 26.406 requires the annual report to describe the current status of groundwater monitoring activities conducted or required by each agency at regulated facilities or associated with regulated activities. The report is required to contain a description of each case of groundwater contamination documented during the previous calendar year. Also to be included, is a description of each case of contamination documented during previous periods for which voluntary clean up action was incomplete at the time the preceding report was issued. The report is also required to indicate the status of enforcement action for each listed case.

A review of the TX GCC list, as provided by EDR, and dated 12/31/2016 has revealed that there are 36 TX GCC sites within the searched area.

## EXECUTIVE SUMMARY

### **EDR PROPRIETARY RECORDS**

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 534 EDR Hist Auto sites within the searched area.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and

## EXECUTIVE SUMMARY

operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 199 EDR Hist Cleaner sites within the searched area.

TX RGA LF: The EDR Recovered Government Archive Landfill database provides a list of landfills derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Texas Commission of Environmental Quality in Texas formerly known as Texas Natural Resources Conservation Commission which changed in 2002.

A review of the TX RGA LF list, as provided by EDR, has revealed that there is 1 TX RGA LF site within the searched area.

Environmental Interest/Information System

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.

. Waste code: D001  
 . Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002  
 . Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

<b>13</b>	<b>JEFFERSON AT BRYAN PL PHASE II 715 LIBERTY ST DALLAS, TX 75204</b>	<b>FINDS</b>	<b>1010756316 N/A</b>
-----------	---	--------------	---------------------------

**FINDS:**

Registry ID: 110033826448

**Environmental Interest/Information System**

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.

**Environmental Interest/Information System**

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Handler Activities Summary:

U.S. importer of hazardous waste: No  
 Mixed waste (haz. and radioactive): No  
 Recycler of hazardous waste: No  
 Transporter of hazardous waste: No  
 Treater, storer or disposer of HW: No  
 Underground injection activity: No  
 On-site burner exemption: No  
 Furnace exemption: No  
 Used oil fuel burner: No  
 Used oil processor: No  
 User oil refiner: No  
 Used oil fuel marketer to burner: No  
 Used oil Specification marketer: No  
 Used oil transfer facility: No  
 Used oil transporter: No

. Waste code: D002  
 . Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Historical Generators:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.

Date Notice Of Violation Issued: 12/29/2004  
 Description 1: Failure to maintain the Stage II vapor recovery system in proper operating condition, as specified by the manufacturer and/or any applicable CARB Executive Order(s), and free of defects that would impair the effectiveness of the system, including pressure/vacuum relief valves, vapor check valves, or Stage I dry breaks  
 Description 2: On January 20, 2005, this office received a written response from John Niemeyer with Dunlap-Swain. Documentation showed that the leaking drain plug in the regular unleaded spill bucket had been fixed and the loose swivel adapter on the premium unleaded dry break had been tightened.

. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D011  
 . Waste name: SILVER

**FINDS:**

Registry ID: 110005056205

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.

Handler Activities Summary:

U.S. importer of hazardous waste: No  
 Mixed waste (haz. and radioactive): No  
 Recycler of hazardous waste: No  
 Transporter of hazardous waste: No  
 Treater, storer or disposer of HW: No  
 Underground injection activity: No  
 On-site burner exemption: No  
 Furnace exemption: No  
 Used oil fuel burner: No  
 Used oil processor: No  
 User oil refiner: No  
 Used oil fuel marketer to burner: No  
 Used oil Specification marketer: No  
 Used oil transfer facility: No  
 Used oil transporter: No

. Waste code: D001  
 . Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002  
 . Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003  
 . Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

. Waste code: D006  
 . Waste name: CADMIUM

. Waste code: D007  
 . Waste name: CHROMIUM

. Waste code: D008  
 . Waste name: LEAD

Date form received by agency: 09/25/2008  
 Site name: LUMINANT GENERATION COMPANY LLC  
 Classification: Not a generator, verified

. Waste code: D001  
 . Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002  
 . Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003  
 . Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F004  
 . Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: CRESOLS AND CRESYLIC ACID, AND NITROBENZENE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005  
 . Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: U151  
 . Waste name: MERCURY

Date form received by agency: 11/29/2005  
 Site name: TXU GENERATION COMPANY LP  
 Classification: Small Quantity Generator

. Waste code: D001  
 . Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002  
 . Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003  
 . Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

. Waste code: D006  
 . Waste name: CADMIUM

**FINDS:**

Registry ID: 110005030769

**Environmental Interest/Information System**

CAMDBS (Clean Air Markets Division Business System) is a national information system that supports the implementation of market-based air pollution control programs administered by the Clean Air Markets Division, within the Office of Air and Radiation. These programs include the Acid Rain Program, established by Title IV of the Clean Air Act Amendments of 1990, and regional programs designed reduce the transport of ozone. These emissions trading programs allows regulated facilities (primarily electric utilities) to adopt the most cost-effective strategies to reduce emissions at their units. Units that reduce their emissions below the number of allowances they hold -- each allowance is equivalent to one ton of sulfur dioxide or nitrogen oxides -- may trade allowances with other units in their system, sell them to other utilities on the open market or through EPA auctions, or bank them to cover emissions in future years. CAMDBS functions include registering responsible officials, establishing allowance accounts, reporting hourly emissions data, and transferring allowances between accounts.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company

Environmental Interest/Information System

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.

Environmental Interest/Information System

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Ind. Haz Waste:

Registration Number: 74492  
 Registration Initial Notification Date: 11/25/1987  
 Registration Last Amendment Date: 07/26/2001  
 EPA Identification: TXD982286940  
 Primary NAICS Code: 332612  
 Status Change Date: 19871125  
 Land Type: PRIVATE  
 Description of Facility Site Location: 723 Cantegral St, Dallas, TX  
 Site Primary Standard Industrial Code: Not reported  
 Site Primary SIC Description: Not reported  
 Registration is Generator of Waste: Yes  
 Registration is Receivers of Waste: No  
 Registration is Transporter of Waste: No  
 Registration is Transfer Facility: No  
 Facility is STEERS Reporter: No  
 Required to Submit Annual Waste Summary: No  
 Facility Involved In Recycling: No  
 Revcr Has Monthly Reporting Requirement: 0  
 Mexican Facility: Not reported  
 Type of Generator: NON INDUS, CESQG  
 TNRCC Region: Not reported  
 Company Name: WEAVER SPRING & BRAKE INC  
 Contact Name: ED FLINT  
 Contact Telephone Number: 214-8238155  
 Mailing Address: PO BOX 710369  
 Mailing Address2: Not reported  
 Mailing City, St, Zip: DALLAS, TX 753710369  
 Mailing County: UNITED STATES  
 Facility Country: UNITED STATES  
 TNRCC Facility ID: 28871  
 Site Owner Tax ID: 752186189  
 Site Location Latitude: -00.000  
 Site Location Longitude: -000.000  
 Last Update to NOR Data: 20061102  
 Ind. waste permit Number: Not reported  
 Mun waste permit Number: Not reported  
 Non Notifier: No

Environmental Interest/Information System

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

TCEQ Region# and City:	4
Region City:	ARLINGTON
Reported Date:	01/21/1999
Entered Date:	07/02/1990
Priority:	4.2 - NO GW IMPACT NO APPARENT THREATS OR IMPACTS TO RECEPTORS
Program:	11 - VCP
CA Status:	6A - FINAL CONCURRENCE ISSUED
Priority Description:	The vertical extent of contamination has been defined and the assessment results document that groundwater is not affected.
<b>Status:</b>	<b>FINAL CONCURRENCE ISSUED, CASE CLOSED</b>

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

 Used oil fuel burner: No  
 Used oil processor: No  
 User oil refiner: No  
 Used oil fuel marketer to burner: No  
 Used oil Specification marketer: No  
 Used oil transfer facility: No  
 Used oil transporter: No

Historical Generators:

Date form received by agency: 05/02/1985  
 Site name: CLASSIC IMPORTS INC  
 Classification: Small Quantity Generator

. Waste code: D001  
 . Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: F003  
 . Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005  
 . Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

**FINDS:**

Registry ID: 110010776838

**Environmental Interest/Information System**

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

**FINDS:**

Registry ID: 110005033686

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.

**FINDS:**

Registry ID: 110005034113

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

**FINDS:**

Registry ID: 110033497776

**Environmental Interest/Information System**

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.

**Historical Generators:**

Date form received by agency: 08/11/1987  
 Site name: GIDDINGS WELLS BODY SHOP  
 Classification: Small Quantity Generator

- . Waste code: D001
- . Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
- . Waste code: F001
- . Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE,

Violation Status: No violations found

**FINDS:**

Registry ID: 110005103075

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Historical Generators:

Date form received by agency: 11/24/1984  
 Site name: EARL SCHEIB #161  
 Classification: Not a generator, verified

. Waste code: D001  
 . Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

FINDS:

Registry ID: 110005081696

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.

Environmental Interest/Information System

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Priority: 4.2 - NO GW IMPACT NO APPARENT THREATS OR IMPACTS TO RECEPTORS  
 Program: 2 - REGION  
 CA Status: 6A - FINAL CONCURRENCE ISSUED  
 Priority Description: The vertical extent of contamination has been defined and the assessment results document that groundwater is not affected.

**Status:** FINAL CONCURRENCE ISSUED, CASE CLOSED

Environmental Interest/Information System

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.
