

DFW AIRPORT STATION

The DFW Airport Station is at Terminal A of Dallas/Fort Worth International Airport. This rail station serves airport users (passengers and employees) and is the terminus station on the Orange Line. As a destination station, the station has no parking. The station is accessible by a covered pedestrian walkway to and from Terminal A. There is also a walkway connecting to the Terminal B station platform, which is currently served by the Trinity Metro TEXRail regional rail line. In late 2025 or early 2026, DART's Silver Line will begin service to the Terminal B station, providing connections to the east across the northern part of the DART Service Area.
